

FREIGHT RUNNER®

The KEITH® Freight Runner® is a chain conveyor that transports cargo with speed and efficiency.

The systems are designed for conveying palletized/unitized loads, and reduces the cost of labor & time.

Automating the transfer process improves efficiency & safety in product distribution.

Dock to Trailer System

Seamless Dock to Trailer transfer of products.

DOCK CONVEYOR

- ▶ Minimal Facility Modifications
- ▶ For Enclosed Warehouses & Open-Air Docks
- ▶ Minimize Product Damage & Improve Employee Safety
- ▶ Speed Up Product Distribution
- ▶ Reduce Load/Unload Time Up To 80%
- ▶ Reduce Labor Costs Up To 75%
- ▶ Move Up To 30 Ton Of Cargo
- ▶ Increase Loads Per Day, Per Trailer

7.5HP Gear Motor Drive

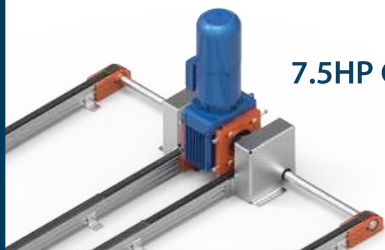

**SEAMLESS CARGO TRANSFER
BETWEEN DOCK & TRAILER**

TRAILER CONVEYOR

- ▶ Requires Minimal Trailer Modifications
- ▶ Speed Up Product Distribution
- ▶ Significantly Cut Load/Unload Times
- ▶ Move Up To 30 Ton
- ▶ Automate Cargo Handling
- ▶ Alternative To Lift-Gate/Pallet Jack Combination
- ▶ Minimize Cargo And Trailer Damage

7.5HP Gear Motor Drives

SPEEDS PRODUCT DISTRIBUTION

FREIGHT RUNNER SYSTEMS SPECIFICATIONS

- ▶ Adjustable speed (up to 9m per minute)
- ▶ Customizable to customer requirements
- ▶ Modular & flexible design capabilities
- ▶ Minimal modifications required
- ▶ Ability to retrofit into existing facility or trailer
- ▶ KEITH support during & after installation

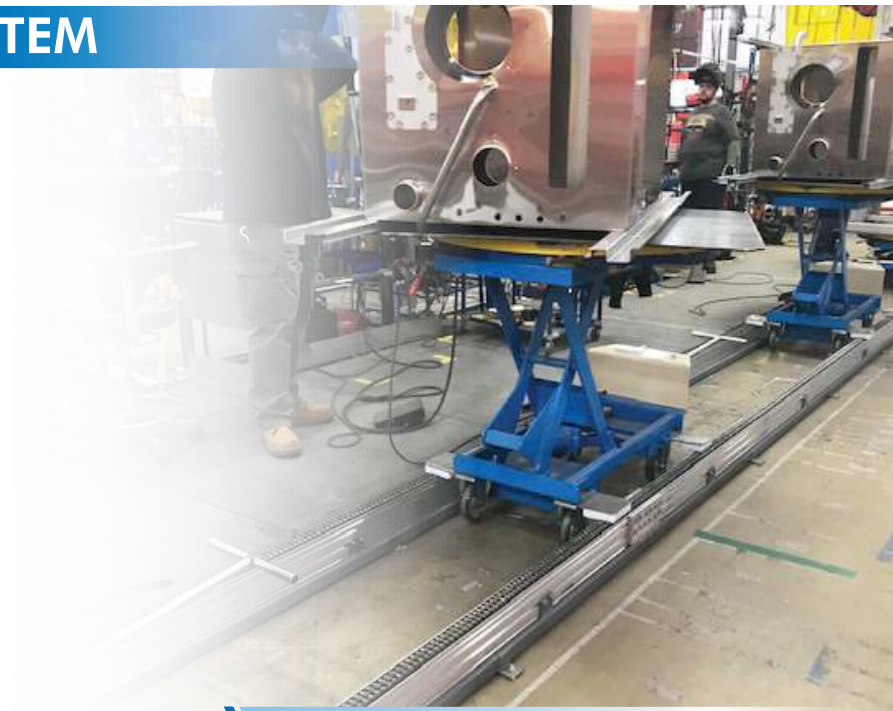

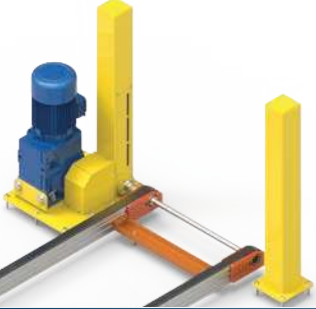

STRAIGHT CONVEYOR SYSTEM

Use as assembly line or for material transfer within the facility

- ▶ Minimal Facility Modification Needed
- ▶ Drop-In Installation Is Fast & Efficient
- ▶ Built To Facility Specifications
- ▶ Variable Weight Capacity With Additional Rails
- ▶ Use For Assembly Line Or Warehouse In-Plant

Conveyance

Multiple
Motor Configurations
Available

“DROP-IN” DESIGN FOR FAST INSTALL

Chain System

- ▶ No Complex Tensioning Systems
- ▶ High Quality 60-2 Roller Chain
- ▶ Armor Coat Option for Corrosion Resistance

Rail System

- ▶ UHMW Chain Guides
- ▶ Heavy Duty Extrusions
- ▶ Protective Anodized Coating on End Caps

With more than 70 years of material handling experience, KEITH Manufacturing Co. is an expert at offering standard and custom conveying solutions.

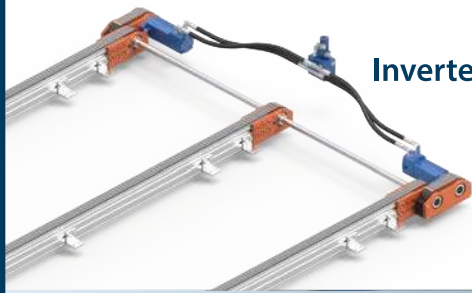

As a fourth-generation family owned company, KEITH is focused on creating customer relationships built on providing excellent products and customer service.

Our mobile Freight Runner® systems utilize trucks for offloading material in tight spaces or for quick trips in a small truck bed.

SIDE SHIFTER TRAILER

- ▶ Efficient Unloading In Congested Areas & Narrow Roadways
- ▶ The Side-Shifting Action Moves Loads From One Side Of The Truck/Trailer To The Other For Easy Unloading
- ▶ Speeds Unloading Process For Maximum Efficiency
- ▶ Fits Into Truck Bed Or Trailer Of Nearly Any Size
- ▶ Ability to Load/Unload From One Side In The Yard Or On The Street

Uses
Inverted Hydraulic Drive/
TR System

EASY UNLOADING IN TIGHT SPACES

LIGHT TRANSIT CONVEYOR

- ▶ Simple Wireless Control System
- ▶ For Pickups, Flat Beds & Cargo Or Dry Vans
- ▶ Tailgate Protector Helps To Prevent Forklift Damage
- ▶ Moves Cargo From Front Of Bed To The Back
- ▶ Unloads Cargo With A Push Of A Button
- ▶ Configurations Start At 2,000lb. Capacity
- ▶ Automated System Gentle On Cargo
- ▶ Speed Up Loading/Unloading Process
- ▶ Easy Installation

Uses
12-Volt Electric Drive/
LT System

**MAKE SMALL DELIVERIES
SAFE & FAST**
